

Caseload and Management of Patients

In general, there was an appropriately diverse mix of patients (including race and ethnicity) seen at this base hospital to meet the clinical training objectives.

The amount of patient care responsibilities assigned to me were just about right for my current level of training.

In general, I had an opportunity to develop procedural skills commensurate with my level of training.

I was given ample opportunity to become involved in learning about management of patient cases.

I felt supported and encouraged to offer my own differential diagnosis and treatment plan.

Expectations/Learning Objectives

Standards for my expected level of performance (how I was to be evaluated) on this rotation were made clear to me at the outset.

On this rotation, the course protocol and its learning objectives were used by my preceptor to help me focus on content and/or skills that I was expected to master.

There were adequate didactics on this service to enhance my existing knowledge base; i.e. conferences were scheduled regularly and occurred as scheduled.

The information presented on this rotation was presented at a pace and at a level that was consistent with my existing knowledge base.

Resources

There were sufficient educational resources (computers, books, journals, & other library materials) available to me on this rotation.

I had access to educational resources at times that were convenient to me.

The COM Unit III Website provided convenient access to course documents and materials related to this rotation.

N=	NA		SD		D		N		A		SA

Osteopathic Principles and Practice

On this service there were facilities and opportunities available to support learning about osteopathic manipulative medicine (OMM).

Faculty knowledgeable in the appropriate use of OP&P in case management were available to me as needed.

I had opportunities to use OMM on this service.

When seeking out opportunities to apply OMM, I felt supported by the faculty here.

Preclinical Preparation

The basic science content I learned in Year 1 assisted me in learning from the experiences I encountered on this service

The systems biology content I learned in Year 2 assisted me in learning from the experiences I encountered on this service.

In general, the material I learned in Years 1 & 2 had little clinical relevance to what I encountered on this service.

Supervision/Feedback

I received timely feedback about development of my clinical skills (e.g. charting, physical exams, history taking, and DPR, etc.)

On this service, I never quite knew where I stood in meeting expected outcomes.

On this service, there was always someone available to answer my questions when I had them.

The post-rotation examination reflected the core content areas as described in the course protocol.

8	0	?	0	?	0	?	0	?	0	?	0	?

Professionalism
I was treated as a professional by those supervising my "student-physician" role on this service.
My supervising faculty on this service "modeled" physician-patient interactions on this service in ways I would like to emulate.
Issues of "professionalism" were included as a point of discussion by faculty on this rotation.

Procedures
I have had opportunities to ventilate patients using bag/mask.
I have had opportunities to intubate patients.
I have had opportunities to insert nasogastric tubes.
I have had opportunities to start peripheral IV's.
I have had opportunities to observe regional anesthesia (spinal/epidural).
I have had opportunities to participate in the utilization of regional anesthesia (spinal/epidural).
I was given enough training and orientation during my years one and two in these procedures.
I feel the on-campus orientation (online) prepared me for these procedures.
I feel the hospital orientation prepared me for these procedures.

Internet/Web-Based Experience

Online instructions for navigating through the web-based materials were clear enough to follow
I experienced technical problems accessing the web-based content
The online "quizzes" helped me assess my knowledge of the content I just learned
Learning in this way helped prepare me for my rotation
I really liked learning in this web-based format

Overall Assessment

This rotation offered a positive learning experience and stimulated my interest in this specialty of medicine.
Taking everything into account, my experiences on this rotation stimulated my commitment to become a physician.
Taking everything into account, my experiences on this rotation stimulated my commitment to become an osteopathic physician.
As a student I felt "comfortable" on this rotation.

N=	NA		SD		D		N		A		SA	
	N	%	N	%	N	%	N	%	N	%	N	%
8	1	13%	0	0%	0	0%	0	0%	5	63%	1	13%

8	0	0%	0	0%	0	0%	2	25%	5	63%	1	13%

Caseload and Management of Patients

Many chances to perform intubations and place IVs. However, it would be great to have it more organized and have the chance to perform or aid in more advance procedures, such as epidurals or central lines.

Resources

AccessMedicine and textbooks provided by the Dept were very helpful. I found the video of marginal assistance in comparison.

Preclinical Preparation

Anesthesia was not discussed in year 1 and 2 with the exception of introduction to some drugs in pharmacology

Web-Based Experience - Please complete the following sentences:

The most favorable aspect(s) of this web-based learning experience for me was (were):

good preparation for rotation

NA

convenience.

Helpful to assess my knowledge of the rotation

If I could change one thing to make this web-based learning experience more beneficial it would be to:

more information

NA

throw out the questions.

More procedures

I would have been better prepared if only the protocol had said something about:

n/a

NA

nothing.

More detail about spinal and epidural anesthesia

The campus online orientation was helpful to me because:

it really wasn't.

Gave a good overall introduction to the rotation

The campus online orientation was not helpful to me because:

READING and DOING are completely different entities.

Not enough detail about most of the topics

Overall Summary - Please complete the following sentences:

The most beneficial experiences, classes, assignments, or activities in all my on-campus MSU/COM courses/experiences, which facilitated my performance on this clerkship rotation, were:

Pharm

Pharmacology

Dr. Dery's intubation labs.

Clinical skills

This rotation could have been improved by:

More interaction with attending

Being able to participate in spinal blocks

throwing out the questions

More direction from the attendings

The thing(s) I like most about this rotation was (were):

Opportunity to intubate/start iv's

Doing a lot of intubations.

opportunity to improve my intubation skills.

Being able to do a lot of procedures
